

Webinar

Open Research Agenda Setting and the Human Brain Project

| December the 6th 2018 |

Introduction:

Consulting and engaging the public in the beginning of the scientific process, the agenda setting, and recognizing the benefits of engaging multiple actor in setting agendas and initiatives that strengthen the selection of research priorities are beginning to take place in more and more countries as a complement to more traditional research agenda setting, made by funding agencies, stakeholders or the single scientists.

This webinar is arranged by The Human Brain Project (HBP) Stakeholder Forums, which provide an opportunity for HBP researchers and stakeholders outside HBP to exchange experiences, ideas, considerations and concerns.

The webinars include 4 guest presentations related to Open Research Agenda Setting, which will be followed by a facilitated plenary discussion.

We welcome all interested parties to join the webinars!
